PREFACE

Government regulations related to environmental activities began in Europe and social demands for protecting the environment are intensifying. Requirements for business activities, production, and material procurement (green procurement) that are eco-friendly, such as forming a recycling-oriented society in which energy and resources are recycled and protecting from environmental pollution by managing chemical substances are constantly growing. Since 1999, based on the SII Group (SII) Environmental Policy, we have been promoting our green procurement from production goods to office supplies with the cooperation of our suppliers.

SII also prioritizes procurement of eco-friendly materials from suppliers that proactively act to support environment conservation based on this standard.

SII will continue its eco-friendly production and business activities, so we will be grateful for our suppliers' cooperation based on their understanding the importance of activities for environment conservation.

SII GROUP ENVIRONMENTAL POLICY

ENVIRONMENTAL CONCEPT

The SII Group will continue to harmonize its corporate activities with the global environment, designate the "Three Green" concept consisting of Green Process, Green Products and Green Life as our basic concept, promote and conduct environmental activities, and contribute to the establishment of a sustainable society that can coexist with nature.

ENVIRONMENTAL ACTIVITY GUIDELINES

We will strive to⊎

- Continue to improve our environmental management system and environmental
 performance, while performing advanced activities that respond to the requirements of
 society to enhance stakeholder value.
- Not only observe all laws, rules, regulations, agreements and other duties, but also mitigate environmental risks and prevent environmental pollution.
- 3. Carry out our tasks with a focus on the following activities based on "SYO" ism*1:
 - Providing products and services that minimize their impact on the environment throughout their lifecycles and can contribute to environmental conservation.
 - 2) Proactively promoting eco-friendly, efficient manufacturing.
 - 3) Fully enforcing energy conservation measures in the entire business activities and addressing global warming.
 - 4) Recognizing the finite nature and the preciousness of resources of the earth, and encouraging their responsible use.
 - 5) Reducing risks arising from chemical substances and promoting the elimination of harmful substances.
- 4. Promote SII Green Purchasing and ensure proper and strict management of chemical substances contained in products.
- Be aware of our impact on biodiversity and all the benefits we receive from it, and make efforts toward biodiversity conservation.
- Raise environmental awareness of all employees and encourage them to protect the environment in their personal lives.
- Make a social contribution to and achieve accountability for environmental protection, while facilitating communication with the society.
- 8. Ask our suppliers for their cooperation in following this policy.
 - *1 "SYO"ism: SII technology philosophy &

SII GREEN PROCUREMENT STANDARDS

1. SII Green Procurement Standards

The SII Green Procurement Standards consist of two sections. Each section contains a description of the standards for that type of product or material. They also include a set of survey questions for each supplier except for suppliers that only supply office supplies.

- (1) Environmental Control System Standard
- (2) Production Goods Procurement Standard
- 2. Scope of Application

These standards apply to all items, both tangible and intangible, that SII procures.

- (1) Tangible goods including raw materials, parts (electrical components, finished goods, and other components), packaging materials, and production equipment.
- (2) Intangible goods including services and work

SII will provide a "Purchase Item List Subjected to Survey" (Note 1) for specific items that are subject to examination for use or inclusion of chemical materials. If SII does not submit such a list, suppliers need not survey materials for use or inclusion of chemical materials.

(Note 1) Purchase Item List Subjected to Survey
List of procurement items that SII requests suppliers to survey.

- 3. The following forms must be completed and submitted to SII, but what is instructed by the SII operating division that requested the survey, for specific requirements should be followed.
 - (1) Form 1 (See page 27) Environmental Control System Questionnaire*1
 - (2) Form 2 (See page 28) Production Goods Procurement Questionnaire*2
 - (3) Form 3 (See page 29) Results of Research on Chemicals Substances Being Used in the Manufacturing Process*3
 - (4) Form 4 (See page 30) Results of Research on Chemicals Substances Contained in Goods*4
 - *1 "Environmental Control System Questionnaire"
 SII requires this information to determine the indirect environmental impact of manufactured products.
 - *2 "Production Goods Procurement Questionnaire"

 SII requires this information to confirm that production goods to be procured are environmentally friendly.
 - *3 "Results of Research on Chemical Substances Being Used in the Manufacturing Process"

 SII requires this information if you use any item specified in the "Production Goods Procurement Questionnaire" in your production process (excluding coolants and extinguishants).
 - *4 "Results of Research on Chemical Substances Contained in Goods"

 SII requires this information if any item specified in the "Production Goods Procurement Questionnaire" is contained in products.
- 4. If necessary, you might be asked to submit materials (such as lists of components in in procured products, analysis data, or SDSs) other than survey sheets, or to submit them in chemSHERPA AI*1 format if SII's customer requests. Please cooperate with the business units on the submission in response to their request.
 - *1 chemSHERPA AI:

Information Communication Sheet for disclosure and communication on information of chemical substances in articles, of which Ministry of Economy, Trade and Industry is promoting the development and dissemination.

- 5. When necessary, SII may conduct on-site audits. We appreciate your cooperation.
- 6. Chemical substances specified herein are independently selected and classified by SII taking into consideration existing legislation and future rules and regulations. These are subject to change without notice depending upon the social and legal environment.
- 7. The SII Green Procurement Standards are subject to revision without notice in the event of changes in the social or legal environment.

Note: Please contact the SII operating division that requested the examination of goods subject to survey.

[I] DEFINITIONS OF TERMS

Use:

Use means to use chemical substances for cleaning products and parts. In other words, use means "to use" chemical substances during manufacturing such that they are not contained in products or parts. Example) Cleaning parts, etc.

Containing

Containing means "to contain" chemical substances that have been intentionally added to products and parts to meet their functionality and performance. Reaction-type residue like non-reaction monomer and impurities are excluded.

If an impurity in a chemical substance for which a threshold level is specified exceeds an acceptable value, the chemical substance is judged to contain a prohibited substance.

Contents concentration:

This is the chemical substance concentration and is calculated using the equation below.

Contents concentration = weight of the target chemical substance / weight of the part that contains the target chemical substance

The unit is ppm (parts per million), or wt% (weight percent).

Note that the definition of "weight of the part" used when calculating the contents concentration differs depending on the applicable laws, so see the threshold level column or remarks column for the target chemical substance.

Intentional addition

Intentional addition means intentionally making products or parts contain substances in order to suffice specific features, appearance, or quality. Intentional addition must be reported by filling Form 4 "Results of

Research on Chemical Substances Contained in Goods" on page 30, regardless of the contents concentration.

Impurity:

This is a substance included in natural raw materials that cannot be completely removed during the process in which the materials are used as industrial materials for manufacturing.

This term also refers to by-products, catalyst residue, and other substances generated during the synthetic reaction processes of materials and drugs.

Examples)

- ·Lead impurities in lead-free solder
- ·Monomer components that cannot be completely removed from synthetic resin materials

Homogenous material:

Material that cannot be mechanically resolved into different material.

Examples)

In the case of a power cable, the homogenous materials are external covering, internal covering, and core.

If a marking such as model name is printed on the external coating, the ink is also regarded as homogenous material.

Article:

An object of which specific form, appearance or design given in production significantly determines the functions of final use, rather than the functions performed by the chemical composition.

Example) Substrates, capacitors, electric motors, gears and plastic cases are articles.

CAS No.:

Unique Nos. of chemical substances designated by the Chemical Abstract Service, a division of the American Chemistry Society.

IEC62474:

The international standard concerning disclosure procedure of contained chemical substances provided by IEC (International Electrotechnical Commission).

Candidate List:

The list of SVHCs (Substances of Very High Concern) which are candidate substances for authorization under REACH Regulation.

[II] ENVIRONMENTAL CONTROL SYSTEM STANDARDS

No.	Items	Criteria	Applied	Suppliers
1	Certification of ISO14001	Obtained ISO14001 or other third-party standard certification (e.g., Eco Action 21, Eco Stage). If not yet obtained, it is desirable to be "under preparation" or "under contemplation" to obtain the certification.	Obtained ISO-14001, etc.	Not yet obtained ISO-14001,etc.
2	Environmental policy	Have an environmental conservation/preservation policy.	_	0
3	Environmental goals	Have concrete goals for environmental conservation/preservation.	_	0
4	Action plan	Have an action plan to achieve the goals.	_	0
5	Organization	Establish an organization to promote environmental conservation/preservation.	_	0
6	Education & Training	Provide employees with an environment-related education and training program.	_	0
7	Internal audits	Internally conduct environmental audits.	_	0
	Control system	Have a system to supervise legislative and voluntary regulations.	_	0
8.2		Be aware of and comply with applicable laws and regulations (See Annex 1 on page 5 for environmental laws).	О	О
8.3		Have a system to control and save energy (e.g., lighting and facilities energy-saving program).	0	0
8.4		Have a system to control and minimize wastes (e.g., separated disposal and zero-emissions).	0	0
8.5		Have a system to control chemical substances (e.g., to update information on chemical substances being used).	0	0
8.6		Introduce or try to introduce a product assessment scheme (e.g., check that environment consideration is taken in the design and production phases).	0	0
8.7		Have a system to collect and recycle used products and packaging materials.	О	О
9	Disclosure	Have a system and tools to disclose information (e.g., Internet, environmental pamphlets and reports).	0	0
10	Biodiversity	To be actively involved in (or support) biodiversity conservation.	0	0

[III] PRODUCTION GOODS PROCUREMENT STANDARDS

Products: Finished or semi-finished products, which provide their intended functionality and performance as they are.

Parts: Items that should be integrated or processed into or for SII products (units/parts, electronic parts, and outer cases).

No.	Items	Criteria	Goods co	Goods covered by this standard		
NO.	items		Packaging	Parts	Products	
1	No harmful substances	No packaging materials (outer boxes, buffer materials, etc.) contain heavy metals (cadmium, sexivalent chrome, mercury and lead).	0			
2	Use prohibition of	No exterior packaging, buffer materials and bags use polyvinyl chloride.	0			
3	Resources saving	No excessive packaging. Measures are taken to reduce packaging volume (less packaging compared with similarproducts or parts).	0			
4	Indication of materials	Plastic packaging materials (mainly styrene foam used as cushions) bear indication of materials.	0			
		Comply with ISO-11469, DIN-6120 or other appropriate standards. ISO11469-compliant marking example: >PS< Polystyrene				
5	Reduction of foams	The use of styrene foam is minimized or it is substituted with other materials: e.g., cardboard buffers, pulp molds	0			
6.1	Use of harmful substances	No material specified in Annex 2 (page 5) is used in any manufacturing process.	0	0	0	
6.2	substances	Use of materials specified in Annex 3 (page 5) is avoided in any manufacturing process.	0	0	0	
7.1	Containing of harmful substances	No material shown in Annex 4 (page 6) is contained.	0	0	0	
7.2	Substances	Containing of materials specified in Annex 6 (page 8 to 11) is avoided.	0	0	0	
7.3		Conditional containing prohibition substances specified in Annex 5 (page 7) is not contained.	0	0	0	
8	Indication of materials	ISO11469 or other standard is marked on plastic materials. Ex) Outer cases of products		0	0	
9	Compliance with laws	The procurement goods comply with legislative controls under the Recycling Law, Energy Saving Law and other applicable laws. Ex) Rechargeable batteries, computers			0	
10	Resources saving	Resources are efficiently used. (Use of recycled parts and resources, miniaturization of goods)			0	
11	Energy saving	Power consumption is low in both operation and standby modes. Compliance with energy saving programs, such as Energy Star program.			0	
12	Wastes	The separability and degradability at the time of disposal is taken into account to ensure proper disposition of goods.		_	0	

Annex 1 List of Environmental Laws

No.	
1	Laws related to air pollution prevention
2	Laws related to water pollution prevention
3	Laws related to noise control
4	Laws related vibration control
5	Laws related to offensive odor prevention
6	Laws related to waste disposal
7	Laws related to ozone layer protection
8	Laws related to handling and storing of hazardous chemical substances
9	Laws related to recycling and reuse
10	Laws related to energy saving
11	Laws related to occupational safety and health
12	Other (Local regulations, etc.)

Annex 2 List of Use Prohibition Substances in the Manufacturing Process

More specifically, substances whose use should be prohibited in the

		manufacturing process (washing).	CAS No. *	Remark
	1	1,1,1-trichloroethane	71-55-6	
	2	CFC group		
	3	HBFC group		
	4	Halon group		
	5	Bromochloromethane	74-97-5

^{*1} Substances that may enter the mouth or directly contact human skin for a long time or short-term repetitive contact.

In cases where the concentration of the material contained in the product or part (reaction-type residue like non-reaction monomer and impurities) exceeds this value, fill Form 4 "Results of Research on Chemicals Contained in Manufactured Goods" on page 30.

Note: The threshold level may be specified independently by the operational division upon customer's request, so please follow what the operational division instructed.

- *3 Exceptional applications
 - ·Semiconductor photoresist
 - ·Business-use photographic film
- *4 This applies to humidity indicating chemicals that are intentionally added and used for drying agents (such as silica gel).
- *5 Intentionally adding this to composite materials (plywood or particle board) is prohibited, as is containing a concentration of 75 ppm or more of fiber or fabric.
- *6 When the content concentration exceeds the threshold level. The content concentration used is based on tin concentration.
- *7 This applies to fabric and leather products that might touch human skin .

 When the content concentration exceeds the threshold value. The content concentration used is based on tin concentration.
- $^{\star}8$ The upper limit of inclusion shall be 0.5 ppm for parts used in toys/nursery items.
- *9 Additives for rubbers are excluded. (Addition to tire is not an exemption.)
- *10 Inclusion of 200 ppm or higher concentration in thermal paper will be prohibited from January 2019.

^{*2} Threshold level

Annex 5 List of Conditional Containing Prohibition Substances in Goods

(substances prohibited from being

	contained, with some exceptions)	CAS No.	Threshold Level	Remark
1	Cadmium / cadmium compounds*1	Refer to Annex N on	100 ppm	Contents concentration

8	Dijachutul shthalata (DIRD)*4	84-69-5	1000 ppm	Contents concentration
0	Diisobutyl phthalate (DIBP)*4	04-09-0	тооо ррпп	in homogenous material
9	Debuging debloride (D)(C) *5	0002.96.2	1000 ppm	Contents concentration
9	Polyvinyl chloride (PVC) *5	9002-86-2		in homogenous material

- *1: The total amount of lead, cadmium, hexavalent chromium and mercury contained in packaging materials shall be less than 100 ppm at weight ratio.
- *2: The amount of hexavalent chromium compounds contained in leather parts in contact with the skin shall be less than 3ppm at weight ratio.
- *3: The amount of lead contained in PVC cable shall be less than 100 ppm at weight ratio.
- *4: Inclusion will be prohibited from July 22, 2018.
- *5: "Polyvinyl chloride(PVC)" includes its homopolymer and copolymer.

Cadmium / Cadmium Compounds

	No.	Use of Applications
Exceptions *6	8(b)	Cadmium and its compounds in electrical contacts.
(may be contained)	13(b)	Cadmium in filter glasses and glasses used for reflectance standards.

Hexavalent Chromium Compounds

	No.	Use of Applications
Exceptions *6	9	Hexavalent chromium as an anticorrosion agent of the carbon steel cooling system in absorption
(may be		refrigerators up to 0,75 % by weight in the cooling solution.
contained)		

Lead / Lead Compounds

	No.	Use of Applications
Exceptions *6	5(b)	Lead in glass of fluorescent tubes not exceeding 0,2 % by weight
(may be	6(a)-l	Lead as an alloying element in steel for machining purposes containing up to 0,35% lead by weight
contained)		and in batch hot dip galvanised steel components containing up to 0,2% lead by weight.
	6(b)-II	Lead as an alloying element in aluminium for machining purposes with a lead content up to 0,4 % by weight.
	6(c)	Copper alloy containing up to 4% lead by weight.
	7(a)	Lead in high melting temperature type solders (i.e. lead based alloys containing 85% by weight or more lead).
	7(c)-l	Electrical and electronic components containing lead in a glass or ceramic other than dielectric ceramic in
		capacitors, e.g. piezoelectronic devices, or in a glass or ceramic matrix compound.
	7(c)-II	Lead in dielectric ceramic in capacitors for a rated voltage of 125 V AC or 250 V DC or higher.
	7(c)-IV	Lead in PZT based dielectric ceramic materials for capacitors being part of integrated circuits or
		discrete semiconductors(*7).
	13(a)	Lead in white glasses used for optical applications.
	13(b)	Lead in filter glasses and glasses used for reflectance standards.
	15	Lead in solders to complete a viable electrical connection between semiconductor die and carrier within
		integrated circuit flip chip packages.

Mercury / Mercury Compounds

	No.	Use of Applications
Exceptions *6	Mercury	in cold cathode fluorescent lamps and external electrode fluorescent lamps (CCFL and EEFL) for special
	purpose	s not exceeding (per lamp).
(may be	3(a)	Short length (≤ 500 mm):3.5 mg may be used per lamp.
contained)	3(b)	Medium length (> 500 mm and ≤ 1 500 mm):5 mg may be used per lamp.
	3(c)	Long length (> 1 500 mm):13 mg may be used per lamp.

Polyvinyl Chloride (PVC)

F Olyvilly Child	Folyvinyi Chloride (F VC)			
	No.	Use of Applications		
Exceptions	PV1	PVC is required due to a safety standard or for quality retention.		
(may be	PV2	There is no substitutable item because of special application or the like.		
contained)	PV3	Material is specified based on the customer's requirement.		
	PV4	Those which do not contain phthalate compounds.		

- *6: Exceptions (cadmium, hexavalent chromium, mercury, lead) shall comply with the exceptions of the RoHS directives (2011/65/EU). If a new exception other than those described above is specified, it will be regarded as an exception. Exceptions relating to batteries shall conform to the EU batteries directive(2006/66/EC(2013/56/EU)).
- *7: Discrete semiconductors are the diode also known as individual semiconductors or mono-functional semiconductors. They are a generic term for simple semiconductors such as transistors performing only one function.

Annex 6 List of Containing Avoidance Substances in Goods (Substances for which containing in

		goods is to be avoided)	CAS No.	Threshold Level	Remark
		I			
	1	Arsenic / arsenic compounds	Refer to Annex R	1000 ppm or	Contents concentration in

 Table F: Azo Compounds(Containing Prohibition)

	Amines from which azo compounds should not be generated due to chemical dissolution	CAS No.
1	o-anisidine	90-04-0
2	2-naphthylamine	91-59-8
3	3,3'-dichlorobenzidine	91-94-1
4	Biphenyl-4-ylamine	92-67-1
5	Benzidine	92-87-5
6	o-toluidine	95-53-4
7	4-chloro-o-toluidine	95-69-2
8	2,4-toluenediamine	95-80-7
9	o-aminoazotoluene	97-56-3
10	5-nitro-o-toluidine	99-55-8
11	4,4'-methylene-bis-(2-chloroaniline)	101-14-4
12	4,4'-methylenedianiline	101-77-9
13	4,4'-oxydianiline	101-80-4
14	p-chloroaniline	106-47-8
15	3,3'-dimethoxybenzidine	119-90-4
16	3,3'-dimethylbenzidine	119-93-7
17	2-methoxi-5-methylaniline	120-71-8
18	2,4,5-trimethylaniline	137-17-7
19	4,4'-thiodianiline	139-65-1
20	4-methoxy-m-phenylenediamine	615-05-4
21	4,4'-methylenedi-o-toluidine	838-88-0
22	4-amino azobenzene	60-09-3

Amine: Hydrogen atom of ammonia was substituted with hydrocarbon group.

Azo compounds: Has an atomic group of "-N=N-." The term "azo" means nitrogen.

- O: Relevant to I of Annex C and I of Annex E attached to the Montreal Protocol
- (B) Global Warming Prevention Law O: Appropriate substances
- (C) Volatile Organic Compounds
- (D) EU Regulations

12 Chloroform

- O: Relevant to volatile organic compounds which might cause soil pollution (SII Standards)

O: Relevant to REACH Regulation or RoHS Directives

Supplementary Explanation Ozone Layer Protection Law:

Sets forth measures including production control, emission restraint and use rationalization of specified ozone depleting substances. Production of specific fluorine and halon is prohibited; HCFC will also be prohibited step by step.

Solvents, anaesthetics

Global Warming Prevention Law:

Restricts emissions of greenhouse gases, such as CO₂ and PFC for global warming prevention.

Occupational Safety and Health Law:

Chemical Substances Examination and Manufacture Restriction Law:

Special Chemical Substances Regulations:

Pollutant Release Transfer Registers (PRTR) Law:

EU Regulations REACH Regulation Sets forth measures for workers to ensure their safety and health and build up their comfortable working environment. It also lays down chemical substances whose manufacture should be prohibited or allowed and whose indication should be imposed.

Prevents contamination of the environment by chemical substances that might damage health. Manufacture and import of new chemical substances should be examined for their decomposition level under this law and use restraint rules should be set forth in this law.

Rules defined in the Occupational Safety and Health Law to prevent workers' health disturbance, such as dermatitis and neuropathy. Confirmation of toxicity of substances to be used, measures for improvement of related facilities to minimize the term and the extent of exposure to chemical substances are set forth herein.

Sets forth rules and regulations to confirm and report emissions of substances into the air and submit material safety data sheet information with the aim of promoting voluntary control of chemical substances and preventing environmental conservation-related issues.

This regulation pertains to the registration, evaluation, approval, and restriction of chemical substances. This regulation restricts the sale and use of chemical substances that are carcinogenic, mutagenic, or otherwise harmful, and the regulation also requires that information be submitted for any article containing more than 1,000 ppm of an SVHC (substance of very high concern).

RoHS (2011/65/EU):

Specifies containing prohibition instructions of toxic substances in electric and electronic products. Specific hazardous chemical substances (lead, mercury, cadmium, hexavalent chromium, polybrominate biphenyls (PBB), and polybrominated diphenyl ethers (PBDE))

(cor	ntinued) [4-[[4-anilino-1-naphthl][4-(dimethylamino) phenyl]	₹						End Use Applications
83	methylene]cyclohexa-2,5-dien-1- ylidene] dimethylammonium chloride (C.I.Basic Blue 26)						0	Chemicals for dyeing of paper, packaging material, and fabric and coloring of resin
84	α,α-Bis[4-(dimethylamino) phenyl]-4 (phenylamino) naphthalene-1- methanol						0	Dyes, inks
	4,4'-bis(dimethlamino)- 4"-(methylamino)trityl						0	Dyes, inks
	Pentacosafluorotridecanoic acid Tricosafluorododecanoic acid						0	Production of the fluoric resin and additive,surfactant Production of the fluoric resin and additive,surfactant
	Henicosafluoroundecanoic acid						ŏ	Production of the fluoric resin and additive, surfactant
89	Heptacosafluorotetradecanoic acid						0	Production of the fluoric resin and additive, surfactant
90	4-(1,1,3,3-tetramethylbutyl)phenol, ethoxylated - covering well-defined substances and UVCB substances, polymers and homologues						0	Water paint
91	4-Nonylphenol, branched and linear - substances with a linear and/or branched alkyl chain with a carbon number of 9 covalently bound in position 4 to phenol, covering also UVCB- and well-defined substances which include any of the individual isomers or a combination thereof						0	Antioxidants,plasticizer,paints,printing ink
92	Diazene-1,2-dicarboxamide (C,C'-azodi(formamide))						0	Synthetic resin rubber blowing agent, bleach catalysts, cement fillers, colorants, bleach photo
93	Cyclohexane-1,2-dicarboxylic anhydride (Hexahydrophthalic anhydride - HHPA)						0	Plasticizer for the thermoplastic resin, curing agent for epoxy resins, insecticides, anticorrosives
94	Hexahydromethylphathalic anhydride, Hexahydro-4-methylphathalic anhydride, Hexahydro-1-methylphathalic anhydride, Hexahydro-3-methylphathalic anhydride						0	Plasticizer for the thermoplastic resin, curing agent for epoxy resins, insecticides, anticorrosives
95	Methoxy acetic acid						0	Synthetic intermediates, anticorrosives
96	1,2-Benzenedicarboxylic acid, dipentylester, branched and linear						0	Laboratories (chemical reagents)
97	Diisopentylphthalate (DIPP) N-pentyl-isopentylphtalate						0	PVC plasticizers,pesticides Plasticizer
	1,2-Diethoxyethane						Ö	Paint solvent,inks
	N,N-dimethylformamide; dimethyl formamide						Ō	Solvents, washing agents
	Dibutyltin dichloride (DBT)						0	Rubber additive,pvc stabilizers
	Acetic acid, lead salt, basic					1	0	Anticorrosive pigment
	Lead (II) carbonate basic					1	0	Pigments, paints,pvc stabilizers
104	Lead oxide sulfate (basic lead sulfate)					1	0	Battery electrode materials,phosphor
105	[Phthalato(2-)]dioxotrilead (dibasic lead phthalate)					1	0	PVC stabilizers
	Dioxobis(stearato)trilead Fatty acids, C16-18, lead salts					1	0	PVC stabilizers PVC stabilizers
	Lead bis(tetrafluoroborate)					1	Ö	Solder plating, alloy plating, electroplating electrolyte
109	Lead cynamidate					1	Ō	Anticorrosive pigment
	Lead dinitrate Lead oxide (lead monoxide)					1	0	Pigments PVC stabilizers,optical glass, pigments, paints, storage battery plates, vulcanization accelerator, pottery, enamel, glass general
112	Lead tetroxide (orange lead)					1	0	Paints, optical glass, general glass, ceramics, enamel, battery, pigments, rubber, pharmaceutical, plastics, electronic materials
113	Lead titanium trioxide		lacksquare			1	0	Electronic ceramic material
	Lead Titanium Zirconium Oxide					1	0	Electronic ceramic material,Piezoelectric devices,Piezoelectric buzzers
	Pentalead tetraoxide sulphate		<u> </u>			1	0	PVC stabilizers
_	C.I. Pigment Yellow 41		1			1	0	Pigments
117	Silicic acid, barium salt, lead-doped						0	Lamp fluorescent material
118	Silicic acid, lead salt		L			1	0	Glass materials
	Sulfurous acid, lead salt, dibasic		lacksquare			1	0	PVC stabilizers
-	Tetraethyllead		<u> </u>			1	0	Gasoline additive
-	Tetralead trioxide sulphate		 			1	0	Battery electrode material, PVC stabilizer
122	Trilead dioxide phosphonate					1	0	PVC stabilizer

ENVIRONMENTAL CONTROL SYSTEM QUESTIONNAIRE

Date	of preparation:								
Com	pany name:								
Nam	e of the place of business:								
	•								
-	artment:								
Nam	e and title of the person wh	o completes this format:		(Signa	ature)				
Cont	act: Phone:	Fax:							
			heck "Yes"						
Inqu	iries about [Environmenta	al Control System] If not ap	pplicable, enter "N.A."						
No.	Item	Question	Yes	Answer No Remarks					
1	Certification of	Have you obtained certification under ISO-14001 or other	163	NO	Nemaiks				
·	environmental ISO	equivalent programs?							
		If Yes, date of certification:							
		If no, check either of the following:							
		a. Have a plan to obtain certification by (date)							
		b. Have no plan to obtain certification							
		If you answer "Yes", proceed to No. 8.2.							
		If you answer "no", proceed to No. 2.							
2	Environmental policy	Do you have any environmental policy on environmental							
	, , , , , ,	preservation?							
3	Environmental goal	Do you have goals for environmental preservation?							
4	Action plan	Do you have an action plan to achieve the goals?							
5	Organization	Do you have a special organization to promote							
		environmental control?							
6	Education & training	Do you provide employees with any educational or training							
		program?							
7	Internal audit	Do you have a system to carry out an internal							
		environmental audit?							
8.1	Control system	(1) Do you have a system to supervise legislative and							
0.0		voluntary control schemes?							
8.2		(2) Do you comply with all laws relating to environment?							
		(Do you know and follow the applicable laws listed in							
0.0		Annex 1 (page 5)?)							
8.3		(3) Do you have a system to control energy consumption?							
8.4 8.5		(4) Do you take actions to reduce wastes?

PRODUCTION GOODS PROCUREMENT QUESTIONNAIRE

Date	of preparation	n:							
Comp	oany name:								
Name	e of the place	e of business:							
Depa	rtment:								
Name	e and title of	the person who compl	etes this format:		(Sig	nature)			
Conta	act:	Phone:	Fax:						
If	tem name:		Model, Item No:	Weight (g):				
		Goods being or to be , Packaging)]	production production.	eck "Yes" or cable, enter	"N.A."				
No.		Item	Question	Yes	Answei Yes No				
1	Packaging materials	Containing of heavy metals	Does the packaging contain heavy metals, such as cadmium, sexiavalent chrome, mercury and lead? If Yes, list them in Form 4 (page 27).	103	140	Remarks			
2		Use of polyvinyl chloride	Do you use polyvinyl chloride in your exterior packaging and buffer materials (e.g., bags)?						
3		Resources saving (packaging material)	Do you take or consider measures to reduce excessive packaging or packaging volume? (Reduced packaging compared with similar products and parts)						
4		Indication of materials (packaging material)	Do you indicate materials used for plastic packaging materials?						
5		Reduction of foams	Do you minimize the use of styrene foam or replace foam with other materials?						
	Products, parts, packaging	Use prohibition substances	Do you use prohibition substances in the manufacturing process of products and parts? (See Annex 2,page 5.) If Yes, list the substances in Form 3, page 29.						
6.2		Use avoidance substances *1	Do you use avoidance substances in the manufacturing process of products or parts? (See Annex 3,page 5.) If Yes, list the substances in Form 3, page 29.						
7.1		Containing prohibition substances	Do you use containing prohibition substances in products or parts? (See Annex 4, page 6) If Yes, list the substances in Form 4, page 30.						
7.2		Containing avoidance substances	Do you use containing avoidance substances in products or parts? (See Annex 6,page 8 to 11.) If Yes, list the substances in Form 4, page 30.						
7.3		Do you use conditional containing prohibition substances in			· ·····				

Note: If any of the above has changed, immediately contact the SII operating division that requested the survey. (Please note that changes of use prohibition substances, containing prohibition substances, and conditional containing prohibition substances are especially important.)

ensure proper disposition of the product?

products or parts? (See Annex 5, page 7).
If Yes, list the substances in Form 4, page 30.

Recycling Law and Energy Saving Law?

Note: Please check "Yes" even if exclusion clauses are included.

Do you indicate materials used for plastic products or parts?

Does the product comply with applicable laws, including the

miniaturize the product? (As compared with similar products) Do you intend to take the above-mentioned measures?

Do you take measures to reduce power consumption in both

Do you take into account the separability and degradability to

operation and standby modes? (As compared with similar products). Do you intend to take the above-mentioned

(Preferably, molded items weighing 25 grams or over.)

Do you use recycled resources or parts, or do you

If "No" is checked in questions 1 and 6.1-7.3, it is not necessary to submit Forms 3 and 4.

Products

- *1: "Use" means "to use" for manufacturing, i.e. washing, products and parts that do not contain chemical substances.
- *2: "Containing" means "to contain" chemical substances that have been intentionally added to products and parts to meet their functionality and performance. Reaction-type residue like non-reaction monomer and impurities are excluded.

 If an impurity in a chemical substance for which a threshold level is specified exceeds an acceptable value, the chemical substance is judged to contain a prohibited substance.
- *3: "Conditional Containing Prohibition Substances" are chemical materials that is basically prohibited to contain and include some exceptions according to applications.

-28-

Even if exceptions are included, please check "Yes" in 7.3 and write the name of chemical compounds present in Form 4.

Ex	Ceramic capacitor	ABC-123	0.7	CCP	1317-36-8	Lead (II) oxide	3,400	Exception	7c-l	

Please specify Containing Prohibition (CP), Conditional Containing Prohibition (CCP), or Containing Avoidance (CAV), referring to pages 6 to 11.

*2: Content

Enter the concentration of the target chemical substance by using the weight based on the threshold level column or remarks column as the denominator.

-30-

*3:Intentional addition/ Impurities/ Exceptions

Enter as follows according to the reason.

- ·Intentional addition: [Intentional]
- ·Impurities or reaction-type residue: [Impurities]
- ·When exception of conditional containing prohibition applies: [Exception]
- *4: Enter the number of exceptions.

Note: If any of the above has changed, immediately contact the SII operating division that requested the survey.
